

Jannat-E-Nur Lisa

Dhaka, Bangladesh | +880 1648495800 | jannatenurlisa@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Computer Science graduate with a strong interest in psychology and human behavior, and a habit of noticing how people think, act, and use products. Experienced in gathering user requirements, conducting usability testing, and analyzing behavioral datasets, and able to explain findings clearly to both technical and non-technical people. Quick to learn, quick to apply, and motivated by work that produces visible results.

WORK EXPERIENCE

Data Entry Executive

July 2026 – Present

BDTender

- Searched and collected tender notices across multiple sources, verifying accuracy and authenticity before entry
- Cross-checked tender details against source websites to ensure data integrity
- Organized and maintained structured files for consistent record-keeping
- Edited tender images to incorporate company logos and source attribution per branding guidelines

Planning and Development Intern

March 2025 – August 2025

European University of Bangladesh

- Collected and understood user requirements across departments for the university's internal working website, supporting institutional strategic planning
- Conducted structured usability testing of the university website and delivered documented improvement recommendations
- Coordinated cross-functional tasks involving faculty, administrative staff, and external vendors
- Assisted in developing institutional planning documentation and reports

Campus Ambassador

2024 – 2025

UNDP Future Nation Project

- Represented UNDP on campus and promoted initiatives and awareness campaigns
- Built networks between the UNDP program and the university community
- Engaged students in participation and outreach activities

PROJECTS

Moonlit

Live Site

HTML, CSS, JavaScript, GitHub Pages

- Built a site that tracks the real-time moon phase based on the user's local date and time
- Calculated every phase, shadow angle, illumination percentage, and crescent direction mathematically using the 29.53-day lunar synodic cycle, without a photo library
- Approximated the moon's zodiac position from its ecliptic longitude, updated daily
- Added named full moons that follow traditional folklore names tied to the month and season

SQA Portfolio for a Client

Live Site

HTML, CSS, JavaScript, Vercel

- Designed and built a portfolio site for a client with a coding environment theme, styled like a Mac terminal and a Mac Notes page to give an authentic coder feel

Personal Blog Website

Live Site

HTML, CSS, JavaScript, GitHub Pages

- Built a multi-page personal blog with suggestions for other posts and a comment feature

Client Personal Portfolio

Live Site

HTML, CSS, JavaScript, GitHub Pages

- Built and deployed a live portfolio site for a client via GitHub Pages with a clean layout and minimal design, demonstrating ability to deliver real-world frontend work

Demo Personal Portfolio Website

Live Site

HTML, CSS, JavaScript, GitHub Pages

- Designed and built a fully responsive personal portfolio website showcasing projects and skills

E-Commerce Churn Risk Identification Using Behavioral Segmentation

Repository

Python, Pandas, Matplotlib, Seaborn, Jupyter Notebooks

- Analyzed 74,817 user events to identify at-risk customers before churn using behavioral segmentation
- Found that financially identical users showed divergent behavioral signals, proving spend monitoring alone is insufficient for retention
- Published full analysis and code on GitHub

SKILLS

Research and Analysis: Usability Testing, Data Collection and Cleaning, Critical Thinking, Report Writing, Documentation

Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Excel (Pivot Tables, Charts), Google Sheets

Frontend Development: HTML5, CSS3, JavaScript, Responsive Design, GitHub Pages

Tools and Environment: Git, GitHub, VS Code, Jupyter Notebooks, Android Studio (Java), Microsoft Office, Google Workspace, Zoom

Professional: Project Coordination, Team Collaboration, Adaptability

EDUCATION

B.Sc. in Computer Science & Engineering 2026
European University of Bangladesh CGPA: 3.49 / 4.0

Higher Secondary Certificate 2019
Dhamrai Hardinge High School and College GPA: 3.42 / 5.0

Secondary School Certificate 2017
Jyoti Vidya Niketon, Dhamrai GPA: 4.32 / 5.0

CERTIFICATIONS

- FC1x: Data Analysis, Basic Probability and Statistics *HarvardX*
- Data Analysis with Python *IBM*
- Introduction to Relational Databases (RDBMS) *IBM*
- Introduction to Structured Query Language (SQL) *University of Michigan*
- Mastering Data Analysis in Excel *Duke University*

RESEARCH

Deep Learning for Brain Tumour Diagnosis Ongoing
Systematic Review

- Conducting a systematic review examining architectural trends in deep learning models applied to brain tumour diagnosis
- Investigating dataset concentration issues and the clinical validation gap between research models and real-world deployment
- Evaluating state-of-the-art CNN and transformer-based approaches across published literature

Real-Time Traffic Sign Detection Using CNN Undergraduate Thesis
Computer Vision, Convolutional Neural Networks, Python

- Researched computer vision techniques for traffic sign detection specifically in Bangladeshi road conditions
- Developed a local dataset and trained CNN models for accurate real-time detection

EXTRACURRICULAR

- Organized orientation programs, freshers' reception, and farewell functions for the department
- Served as anchor and host for departmental events and functions
- Participated in decision-making meetings for departmental and university development
- Participation certificate, Intra-Department Programming Contest, European University of Bangladesh, 2023
- Entrepreneurship and Business Development Training, iDEA, BCC, ICT Division, Dhaka, 2023

LANGUAGES

English: Fluent Bengali: Native Korean (Hangul): Conversational
